## NETWORK THERMOSTAT ANNOUNCES PARTNERSHIP WITH ALPSCONROLS.COM

Grapevine, TX, June 30, 2022 – Network Thermostat™, a leading provider of connected commercial IoT thermostat solutions for facility energy management and automation (small businesses, K-12 education, hospitality, multi-family, government, retail and restaurant chains, commercial buildings, and light industrial), announced today its joint partnership with alpscontrols.com.

Network Thermostat is excited about the new opportunity to offer its products on alpscontrols.com which is recognized as one of the leading providers of HVAC and building automation controls in the USA and the Americas.

*“We are very pleased to join forces with alpscontrols.com. Their dedication to service, selection and convenience make it the perfect fit for Network Thermostat and our X-Series Commercial IoT Smart Thermostats with CO2, IAQ, BACnet, and Modbus support.” – John Brower, VP Sales, Network Thermostat*

This timely partnership complements our recent platform improvements of BACnet and Modbus support along with our market leading web platform CloudManager™ that simplifies and extends the control of unlimited locations and multi-role customizable user accounts. Procuring an HVAC control solution that meets all of your requirements has never been easier.

*“We are continually searching out innovative products that solve real problems for our customers and their end-user customers. Network Thermostat is a great example of a product that fits as well in highly complex commercial control applications while meeting the BMS needs for multi-site retail, multi-unit residential, and light commercial applications. We know they will prove to be a great addition to our product line.” – Paul Wickberg, VP Business Development, alpscontrols.com*

### **About alpscontrols.com**

[alpscontrols.com](http://alpscontrols.com) is the leading online marketplace for HVAC and building automation control parts and peripherals in the Americas, offering hundreds of millions of products from over 175 of the industry's most well-known and respected brands. The company's unique and innovative business model delivers unparalleled service, selection, convenience, productivity, and price to controls contractors all over the world looking for a better, more efficient way to buy parts.

### **About Network Thermostat**

At NetX, our mission is to provide significant energy-saving solutions to our customers through the use of communicating network thermostats. Headquartered in Grapevine, Texas, with more than 25 years of design experience for connected devices including IP thermostats, wireless thermostats, WiFi thermostats, and Ethernet thermostats, NetX designs and manufactures cost-effective electronic and software products meeting the needs for on-site and remote-location control for the heating, ventilation, and air conditioning (HVAC) market. NetX's products place simple, user-friendly tools in the hands of institutional, commercial, multi-family, and light industrial customers. Since 1995, Network Thermostat has been recognized as an industry pioneer and leader in cost-effective networkable HVAC solutions.

We are an industry-recognized leader in a newly emerging market segment; networkable, smart thermostats and systems.
