NETWORK THERMOSTAT ANNOUNCES CONTRACT WITH BUYBOARD

Grapevine, TX, March 7, 2022 – Network Thermostat™, a leading provider of connected thermostat solutions for facility energy management and automation (small businesses, K-12 education, hospitality, multi-family, government, retail and restaurant chains, commercial buildings, and light industrial), announced today it has become a vendor for the BuyBoard Purchasing Cooperative.

Network Thermostat is proud to announce the award of a contract from BuyBoard Purchasing Cooperative. In an age where verifying compliance and pricing is more difficult, BuyBoard offers a one-stop solution for public entities to secure much-needed products and services.

BuyBoard lists five major reasons for utilizing their service:

- 1). Compliance: BuyBoard members meet state and local purchasing requirements through the interlocal purchasing agreement.
- 2). Simplified Purchasing: Vendors are competitively procured and vetted so members don't have to go out for a bid. BuyBoard is available throughout the United States, wherever the use of purchasing co-ops is allowed.
- 3). Competitive Pricing: Combining the purchasing power of local governments allows members, big and small, the leverage to achieve better pricing through economies of scale and reduced RFQ administrative costs.
- 4). Trust and Transparency: BuyBoard is member-focused and member-governed by a board of directors and has been serving school districts and state and local governmental entities nationwide since 1998.

About Network Thermostat

At NetX, our mission is to provide significant energy-saving solutions to our customers through the use of communicating network thermostats. Headquartered in Grapevine, Texas, with more than 25 years of design experience for connected devices including IP thermostats, wireless thermostats, WiFi thermostats, and Ethernet thermostats, NetX designs and manufactures cost-effective electronic and software products meeting the needs for on-site and remote-location control for the heating, ventilation, and air conditioning (HVAC) market. NetX's products place simple, user-friendly tools in the hands of institutional, commercial, multi-family, and light industrial customers. Since 1995, Network Thermostat has been recognized as an industry pioneer and leader in cost-effective networkable HVAC solutions.

We are an industry-recognized leader in a newly emerging market segment; networkable, smart thermostats and systems.
